

Pierre Paillot

AI PRODUCT & AUTOMATION BUILDER

I turn a business problem into an AI product your teams actually use. From audit to production, with nothing left gathering dust.

PROFILE

Former transformation consultant (Goalmap, 500+ organizations) turned AI builder. I diagnose a business problem, build the tool that solves it, and make sure teams adopt it. Founder of a company. I direct AI to produce production software: SaaS, automations, agents. A consultant stops at the slide, a developer ships a tool nobody uses. I do all three.

WHAT I DO

I audit	I build	I drive adoption
I understand the business problem before writing a single line. Five years at the interface between leadership and teams.	SaaS, automations, agents. From design to deployment, fast, clean, in production.	A tool nobody uses is a dead tool. Change management and real adoption.
